

THE NEW MASTERS

## LIGHT PAINTING MASTERS

The dark is our canvas, the light is our brush - Anon

## PAINTING WITH LIGHT

Light Painting Photography can be broken down into 3 general categories:

- Light Drawing - where the light source can be seen by the camera. During a long exposure the artist uses this light source to draw or create a design within the frame

## PAINTING WITH LIGHT

Light Painting Photography can be broken down into 3 general categories:

- Light Drawing - where the light source can be seen by the camera. During a long exposure the artist uses this light source to draw or create a design within the frame
- Kinetic Light Painting - The camera is moved during the exposure (rotation, camera tossing, panning, zooming) and these moves are used to build the final image

## PAINTING WITH LIGHT

Light Painting Photography can be broken down into 3 general categories:

- Light Drawing - where the light source can be seen by the camera. During a long exposure the artist uses this light source to draw or create a design within the frame
- Kinetic Light Painting - The camera is moved during the exposure (rotation, camera tossing, panning, zooming) and these moves are used to build the final image
- Light Painting - where the artist uses handheld light sources to selectively illuminate parts of a scene during a long exposure photograph. The light source is not visible from the camera: it's the projection of the lights on the surfaces which is recorded

## PAINTING WITH LIGHT

Light Painting Photography can be broken down into 3 general categories:

- Light Drawing - where the light source can be seen by the camera. During a long exposure the artist uses this light source to draw or create a design within the frame
- Kinetic Light Painting - The camera is moved during the exposure (rotation, camera tossing, panning, zooming) and these moves are used to build the final image
- Light Painting - where the artist uses handheld light sources to selectively illuminate parts of a scene during a long exposure photograph. The light source is not visible from the camera: it's the projection of the lights on the surfaces which is recorded
- **For our competition:** A creative art-form made possible by the magic of long-exposure photography. During the exposure, the image should be influenced by illuminating the scene as a whole via some controlled method of your choice or, if appropriate, by walking into the space being captured and using a handheld light source to 'paint' into the image

"Pathological Walk From in Front"

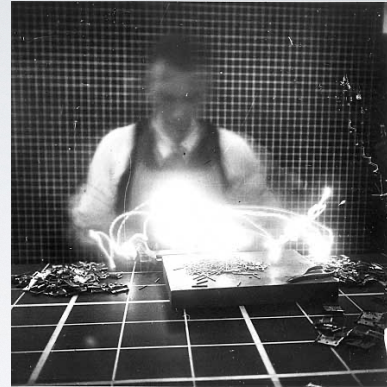

ÉTIENNE-JULES MAREY & GEORGES DEMENY

(1830-1904)

(1850-1917)

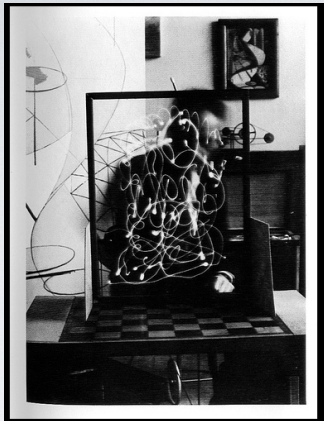

FRANK GILBRETH

(1868-1924)

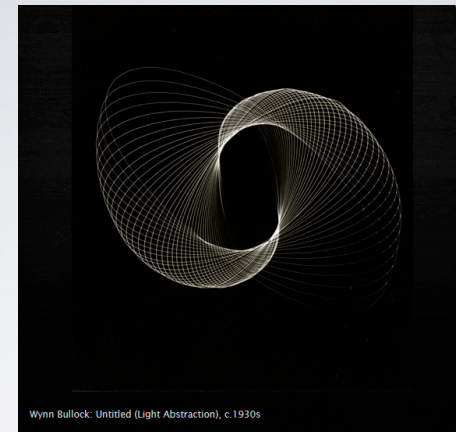

VILHO SETÄLÄ

(1892 - -1985)

MAN RAY

(1890 - 1976)

WYNN BULLOCK

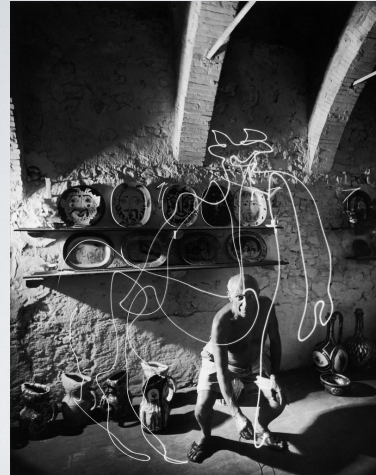

(1902 -1975)
